Abstract (en)
[origin: WO2013024073A1] The invention relates to a method for producing an electric contact support (1), in particular a switching bridge (2). A base profile (3) is produced in a base material (4). Subsequently, a contact material (5) is applied onto a contact receiving region (6), said contact material (5) being shaped into a contact (7). Subsequently, the contact support (1) is removed from the base material (4).
