Abstract (en)

[origin: EP2743007A1] The lath (1) has an adhesive strip profile (2) that is provided with a visible side (3) on which a sheet-like paint layer (4) and a gap-free directly adjoining lacquered paint layer (5) are provided. The sheet-like paint layer is adhered on the adhesive strip profile. The lacquered paint layer is adhered cohesively on the strip profile, and is provided with surface appearance which is different from the surface phenomenon of the sheet-like paint layer. The strip profile is made of polymeric material, aluminum and a composite material. An independent claim is included for method for painting double-colored portion lath.
