Abstract (en)

The layer has a special surface coating applied on the layer, where coefficient of sliding friction of the coating is increased to a value larger than 0.5 opposite to actual surface of damming material. The surface coating is formed as a coextruded polyurethane coating having a rough and/or uneven surface or extruded polyethylene coating having an obtuse surface. The extruded polyethylene coating consists of elastomer and polymer, where increase of the coefficient of sliding friction is determined from surface unevenness and elasticity of the coating.

Abstract (de)

Bodenbelags-Dämmunterlage mit einer rutschhemmenden Oberflächengestaltung, dadurch gekennzeichnet, dass eine spezielle Oberflächenbeschichtung auf die Dämmunterlage aufgebracht wird, deren Gleitreibbeiwert μ gegenüber der eigentlichen Oberfläche des Dämmmaterials erhöht ist auf einen Wert grösser als 0,5.
