Abstract (en)  
[origin: EP2743190A1] The method involves introducing the chunks into first plastic bag. The first plastic bag is introduced into second plastic bag after introducing of chunks or first plastic bag is inserted into second plastic bag before introducing of chunks into first plastic bag, so that the chunks are present in a double bag. The air from the double bag is removed after introducing of the chunks and before sealing the double bag, such that a total volume of double bag relative to a volume of the chunks is 2.4 to 3.0. A relative air humidity is maintained in the range of 30-70%. An independent claim is included for double bag.
