Abstract (en)
[origin: EP2743220A2] The alignment apparatus (10) has two variable contact elements (2) moving in degrees of freedom (5) and two controllable drives (1) for moving the contact element, where the variable contact element has a switch (3) having two switching positions. The respective switch is associated with a counter element (4), where the switch and the counter element are each engageable in a mechanical engagement with each other for adjusting the switch. The switch is designed as a rotary switch or slide switch.
