Abstract (en)

[origin: EP2743221A1] The apparatus has a transport unit (26) that is configured for transporting a bundle of notes. The transport unit is provided with a belt, which is drivable by a drive unit (36). A clamping element (44) is arranged in first position such that a banknote bundle is located between clamping element and the belt in receiving portion (46) is fed and removed. The clamping element is arranged in second position such that recorded bundles of notes between the belts and the clamping element is clamped in the receiving portion.
