Abstract (en)
[origin: EP2743570A1] The lamp (8) has a reflector surface (R1) provided at a reflector base (1) and a light i.e. LED. The reflector surface comprises an outline (12). The light is provided at another reflector base (2) with another reflector surface (R2). The later reflector base comprises lateral shield elements (21) between which the light is positioned. Inner surfaces of the shield elements are turned towards the light and proportionately form the latter reflector surface. The shield elements comprise an outer edge border, which represents another outline.
