Abstract (en)
[origin: EP2743590A1] The domestic appliance has a holding element that is connected to the adjacent rear wall on the housing through the contact of the contact wall with the housing, such that the movement of the housing is prevented. The holding element is attached to the housing and to the adjacent side wall, such that the side element (30) allows the contact of the household appliance portion with the contact wall. The holding element is provided with a 90-degree angle (31) between the housing and side element.
