Abstract (en)  
[origin: EP2743621A2] The apparatus (100) has a cold shed housing forming a cold shed inner space (112). A shelf (108) is arranged in the cold shed inner space. The shelf is located in sections with a holding element (110) that is provided with two connectors. The first connector is engaged with a first recess of the cold shed housing for forming a plug connector. The second connector is engaged with a second recess of the cold shed housing for forming another plug connector. The housing comprises a side wall, in which the first recess is arranged.
