Abstract (en)

[origin: US2014157648A1] Disclosed is a telescopic sight mount with adjustable forward tilt. The mount comprises a basic body and an attachment and the basic body and the attachment, by virtue of an arrangement of a clamping screw at an angle greater than a self-locking of a material pairing and less than 90°, have a positive connection. Also disclosed is a telescopic sight mount with adjustable forward tilt wherein the mount comprises a basic body and an attachment and the basic body and the attachment comprise a tapered joint.
