Abstract (en)

An assembly (1) for the management and printing of diagnostic reports of emergency lighting systems (2) comprising at least two emergency lighting fixtures (3) that are interconnected by means of a specific data transceiving channel (4). The assembly (1) comprises at least one control and management unit (5) provided with at least one RS-485 port (6) for connection to components of the type of printers, display screens, diagnostic devices (7) and the like, at least one port (8) for connection to an LAN network (9), at least one RS-232 port (10), for connection to components of the type of printers, modems (11) and other devices. The control and management unit (5) is connected, optionally with the interposition of other devices, to the data transceiving channel (4) for the interconnection of the emergency lighting fixtures (3), by means of the at least one RS-485 port (6).
