Abstract (en)  
[origin: WO2013023685A1] The invention relates to a glove 10 comprising an outer glove layer, a reservoir inside the outer glove layer, and apertures in the outer glove layer for releasing liquid from the reservoir, wherein the majority of the apertures 22, 24, 26, 28, 30 are arranged in the fingers or part of the palm adjacent the junction of the wrist and hand part of the outer glove layer. The invention also relates to a glove where, alternatively, the apertures are selectively openable and closable. The invention also relates to a glove comprising an inner glove layer and an outer glove layer, and a reservoir between the inner glove layer and the outer glove layer, wherein the glove also comprises a liquid barrier arrangement. The invention also relates to a glove 10 comprising an inner glove layer and an outer glove layer, and a reservoir 16 between the inner glove layer and the outer glove layer, wherein the inner layer has variable thickness. The invention also relates to a glove 200, for putting on another glove, the glove comprising a liquid impermeable layer, one or more holes 204 in the liquid impermeable layer, and one or more liquid permeable cleaning elements 206 arranged on the one or more holes.
