Abstract (en)
[origin: WO2013026589A1] The invention relates to a strip-shaped mold cavity (10, 10a) and to the production thereof for producing surface materials, in particular surfaces during the production of laminated sheets (1), comprising a structured surface (13, 13a), a flexible carrier strip layer (11, 11a) made in particular of paper or film, and a layer (12, 12a) for separating the surface material (2) and which is arranged on the side of the surface material (2). According to the invention, the structured surface (13, 13a) is arranged on the side of the separating layer (12, 12a) facing away from the surface material (2).
