Abstract (en)

[origin: WO2013024132A1] The invention relates to a packaging unit for accommodating glass rolled onto a winding core, said packaging unit comprising at least two wall parts that can be separated from one another and together form a closed unit. A first retaining element is connected to a first wall part, and a second retaining element is connected to a second wall part arranged opposite the first wall part. A damping element is connected to at least one retaining element and/or to at least one wall part.
