Abstract (en)
[origin: WO2013134804A1] The invention relates to a vehicle headlight (1) comprising at least one laser light source (2), at least one lamp element (3) that may be stimulated to emit visible light which can be irradiated by said laser light source (2), and at least one imaging optical element, for example a reflector (4) and/or a lens, wherein said laser light source (2) is arranged in front of said lamp element (3) viewed in the main beam direction (100) of the vehicle headlight (1) such that the light from said laser light source (2) radiates in the opposite direction to said main beam direction (100) of the vehicle headlight (1).
