Abstract (en)
[origin: WO2012123069A2] The invention relates to a cable retainer (10) for fastening cables (12) or cable bundles in thin-walled cabinets (14) provided with a breadboard (16), for example, metal cabinets, having a bottom area (18) allowing fastening in an opening (16) in the thin wall (14), and from which fastening strips (20, 22) emanate, which at the free ends (24, 26) thereof can be connected (34, 36) with one another, thus encircling the cross section of the cable bundle (12). The invention is characterized in that the connection is made by way of a pin (34), which emanates from the middle of the fastening strip (22), and which can be accommodated in a corresponding bore (36) in the other fastening strip (34), the bore being positioned in the direction of the cable, and in that cable protectors (20) can be slipped onto the fastening strips (20, 22).
