Abstract (en)

[origin: EP2560303A1] The device has a communication module i.e. eGO module for communicating through a body. The module includes a contact surface for electrical contact with the skin of a wearer, where a base (4) includes the eGO module. Straps (5A, 5B) secure the device to a part of the body of the wearer, in contact with the skin. A clip (6B) and another clip are provided for attaching a personal accessory or a watch case (8) to the device, where the clips are positioned on the base or on the straps.
