Abstract (en)

[origin: WO2013023881A2] The invention relates to a housing element (10) for a control device housing (1), comprising one or more first edge sections (11) for contacting a respective second edge section (21) of a second housing element (20) associated with the control device housing (1), a sealant (2) curable by means of humidity being arranged between the first and second edge sections, wherein at least one of the first edge sections (11) has at least one opening (13) for the communication of the sealant (2) with air having humidity in the contacted state of the housing elements (10, 20).
