Abstract (en)
[origin: EP2745729A1] The dryer (1) has a fan (5) for blowing air from a outlet opening (7) of a nozzle (8). The air is flowed in a flow direction (9) from the outlet opening. The nozzle is provided with two relatively movable adjusting elements i.e. slat, which are moved relative to each other and plastically deformed. The movable adjusting elements of the nozzle alters the direction of flow of exiting air from the outlet opening of the nozzle. A cover device is provided with a membrane. The adjusting elements are moved by an adjusting device.
