Abstract (en)

[origin: EP2746039A2] The system (1) has a pressing device (3) for pressing biological material (4) to a press element (5) and a packaging device (6) for packaging pressed element. The pressing device and packaging device are arranged together such that a block system (2) is charged with press elements by packaging device and pressing device. The pressing device has pressing stations (20) that are arranged on a (21) such that pressing stations are arranged for continuous feed of packaging device with pressing elements in a transfer device (7). An independent claim is included for a method of manufacturing and packaging of compacts of biological material.
