Abstract (en)
The deep-drawing packaging machine (1) has a forming station (2) that is provided for forming a trough (14) in a film (10), an insert station (3) and a sealing station (4). The sealing station is provided with a sealing tool. The retention device (20) is provided for holding the flexible and partly curved products (15) in the trough, such that a relative movement is provided between the retention device and the sealing tool along a production direction (R). An independent claim is included for a method for operating an intermittently working deep-drawing packaging machine for packing a group of flexible and partly curved products.

Abstract (de)
Die Erfindung betrifft eine Tiefziehverpackungsmaschine (1) und ein Verfahren zum Betrieb einer Tiefziehverpackungsmaschine (1), die eine Einlegestation (3) und eine Versiegelstation (4) aufweist, um längliche Produkte in Mulden einzulegen und darin zu halten, bis eine Deckelfolie angeheftet wurde, um die Mulden abzudecken.
