Abstract (en)

[origin: EP2746443A1] A method for controlling a washing machine, comprising: the execution of a first wash step, wherein the wash water is gradually warmed up and the drum is moved in rotation at a first speed, in order to facilitate the action of one or more cleansing substances present in the water; the execution of a second wash step, following said first wash step, wherein the water temperature is kept above a predetermined threshold and the drum is moved in rotation at a second speed, in order to exert a mechanical cleaning action on the laundry in the drum.
