Abstract (en)
[origin: EP2746459A2] Disclosed is a method to operate a laundry drying machine 1, wherein the laundry drying machine 1 comprises: a control device 12, an accommodation chamber 3 for accommodating laundry, an air circulation channel 7 in communication with the accommodation chamber 3, and a condensation valve 14 for supplying water into the air circulation channel 7 to condense humidity from air coming from the accommodation chamber 3; the method which comprises executing a preheating step S1; in the preheating step S1, providing heated air in the accommodation chamber 3 and turning off the condensation valve 14; the method further comprising: performing a detecting step S2 for detecting condensation water after the preheating step S1; in the detecting step S2, stopping providing heated air in the accommodation chamber 3, turning on the condensation valve 14, and determine, according to a temperature change at a specific position in the air circulation channel 7, a quantity of water supplied by the condensation valve 14. Also disclosed is a laundry drying machine 1 that can implement such method.
