Abstract (en)

[origin: EP2746496A2] The device has a cover (6) enclosing a handle (1) in a mounted position and comprising two locking elements (9). A lock (7) is provided secure the cover on the handle in mounted position and release the cover from handle for removing cover from handle. A counter portion (5) is located on the handle, a handle fixture, a door or window. Counter portions are matched and interacted with the locking elements. One locking element is a locking bar (10) of the lock.
