Abstract (en)

[origin: EP2746521A1] The support (1) has an elastic locking unit or bistable spring unit (7) that is arranged for maintaining an electric connector (5) provided in a connected position (52) in a locking position (72). The locking unit is provided bistable between the locking position in which the locking unit maintains the connector connected to an electric motor (3), and an unlocking position in which the locking unit is arranged remote from the connector. The locking unit is maintained between two supports i.e. fulcrums (8, 81).
