Abstract (en)  
[origin: EP2746598A1] The assembly (1) has a valve carrier (2), and a valve unit comprising an electrically operated drive device. The valve unit is accommodated in a retaining area (27) of the carrier, where the carrier comprises valve carrier-fluid channels. A closing cover (7) has a covering body (89) with a limiting wall (90), where the wall has display through holes (92a, 92b) that are tightly closed by transparent closure units (93a, 93b). The holes comprise light output units (96a, 96b) arranged in the area and/or attached to hand operating units that manually operates the valve unit.
