Abstract (en)

The label has a separation layer (14) covering a part of an adhesive layer (6), and designed such that retaining force between a mobile multi-layer unit and the separation layer is lower than moving force of the mobile multi-layer unit. The retaining force is higher than retaining force of a cutting layer (13) such that a part of a pressing layer (12) placed in a superposition position of the cutting layer remains integrated into a multi-layer unit fixing part during application of the moving force.

Abstract (fr)

Etiquette autoadhésive comportant une couche de sectionnement (13) présentant par rapport à l'élément matériel frontal (8) une force de retenue qui est inférieure à la force de décollage de l'ensemble multicouche mobile, de sorte que la couche de sectionnement (13) est séparée de l'élément matériel frontal (8) lors de l'application de la force de décollage de l'ensemble multicouche mobile.
