Abstract (en)  
[origin: EP2747109A1] The switching device (1) has an erasing unit that is provided with arc extinguishing chamber for extinguishing between the first contacts (9,10) and the second contacts. The guide rail devices are respectively provided with a first guide rail and a second track rail. The first guide rails are started from the first contact and are extended in opposite directions. The second guide rails are extended from the second contact in opposite directions. The first running rails are electrically conductively connected in the form of a closed loop.
