Abstract (en)

[origin: WO2013030503A2] One subject of the present invention is a utensil (1) comprising a support (2) having a contact surface (21) that is at least partially metallic and that is covered by a non-stick coating (3) based on a fluorocarbon resin. The contact surface (21) comprises an interface layer (210) that is chemically activated by plasma. Another subject of the present invention is a process for manufacturing such a utensil (1).
