Abstract (en)  
[origin: WO2013026988A1] The subject of the present invention is a magnetic bit-holder bracelet device intended to be worn by a user on his wrist and to hold screwdriver or similar bits (1). It comprises a bracelet (2') made of plastic, that can be attached or fixed to said wrist, incorporating, over all or part of its circumference, a row of pockets (3') and holder cavities (4') built into said bracelet (2'), each formed by one of said pockets (3') or attached to said bracelet (2'), each in one of said pockets (3') and able to house axially, and removably, one of said bits (1), the blind end of each holder cavity (4') comprising a magnet able to apply a magnetic force of attraction to the bit (1) concerned in order to retain and hold it in the relevant holding cavity (4').
