Abstract (en)
[origin: WO2013032342A1] Skirting board system comprising skirting board for attachment to wall, floor or ceiling, comprising a back side which after mounting lies in tight engagement with a substrate (10) in the form of a wall surface, alternatively floor or ceiling surface. The skirting board (11) has at least one longitudinal recess groove (12) at the back side thereof, as well as a number of double sided sprig plates (13) of a maximum width corresponding to the width of the longitudinal groove (12), the double sided sprig plates (13) being arranged to be located in the recessed groove (12) in a number and at a mutual distance that is adapted to the skirting board (11) in question and the substrate (10) in question.
