Abstract (en)  
[origin: WO2013030163A1] The present invention relates to a system for managing a plurality of peripherals (1), each peripheral (1) being connected to an Internet access box (2) and each Internet access box (2) being linked to the Internet (30) via an operator network (20), characterized in that it comprises a peripherals management equipment (4) disposed within the operator network (20), a list of virtual objects (1') being stored on the peripherals management equipment (4), each virtual object (1') representing in a unique manner a peripheral (1). The present invention also relates to methods of installing, remotely controlling and monitoring at least one peripheral (1).
