Abstract (en)

The invention relates to a method of operating a slitter-winder for winding fiber webs into partial fiber web rolls, in which time period (10) of slitting and winding of one set of partial web rolls comprises acceleration period (10A), normal running speed period (10N) and deceleration period (10D) in which during acceleration period (10a) the speed of the slitter-winder is accelerated to normal running speed of slitting and winding. In operating the slitter-winder the speed is accelerated to the normal running speed of slitting and winding in the beginning of winding the set of the partial fiber web rolls by using high acceleration rate from 1,3 m/s² to 3,0 m/s².
