Abstract (en)

A fluid may be transferred using a fluid supply assemblage involving a plurality of intermodal containers (10) and a transfer manifold (50). The intermodal containers have a tank (15) for the storage of the fluid, which tanks are connected to a transfer manifold (50). The transfer manifold (50) has a plurality of manifold inlets (55) and a manifold outlet (60). The manifold outlet (60) is in fluid communication with at least two tanks of the plurality of intermodal containers (10) via the transfer manifold (50).
