Abstract (en)
[origin: WO2013030638A1] Continuous pressing line comprising: a cylindrical chamber (120) with perforated wall, having a closed bottom (11) and an opposite open bottom with adjustable discharge opening; a piston (9) moved by an actuator (8) adapted to sealingly slide along the axis of said chamber (120) to be positioned in proximity of the closed bottom (11) or immediately outside the open bottom of the cylindrical chamber (120) to adjust the discharge opening; a variable displacement pump adapted to supply the product to be pressed to said container (1), through the closed bottom (11) thereof; a centralised control system adapted to control said actuator (8) of said piston (9) and said variable displacement pump.
