Abstract (en)
[origin: WO2013030617A1] The rail tank wagon (1) with the cylinder shaped tank (2) located on the underframe (3) of which at least the central part forms two parallel longitudinal beams (5, 5'). The longitudinal beams (5, 5') are terminated with the wagon ends (6) and the headstock (7) and the main cross beam (10) on both ends. There are cross cradles (11) arranged above the main cross beams (10) for placement of the rail tank wagon (2) and on sides of the underframe (3) there are longitudinal cradles (12) for connection with the tank (2). Each of the longitudinal beams (5, 5') has at least two brackets (13) bent towards the tank (2) in the upper part, arranged for connection to the tank (2).
