Abstract (en)

[origin: WO2013050039A1] The roof window (1) has a frame (2) defining a frame plane, and a sash (3) having a top member (9), a bottom member (10) and two side members (11, 12) defining a sash plane. The sash (3) has an opening for a pane (4) and an outer surface opposite said opening, the window (1) further comprising in connection with said sash top member (9) a top sash module (411) with a first side (412), a second side (415) opposite to and extending substantially parallel with said first side (411), a third side (413) and a fourth side (414) 10 opposite to and extending substantially parallel with said third side (413), said third and fourth sides (413, 414) extending substantially perpendicular to and connecting said first and second sides (412, 415), wherein said top sash module (411) is connected to said top sash member (9) and/or said side sash members (11, 12) in such a way that said top sash module (411) is arranged at the outer surface of said sash (3).
