Abstract (en)  
[origin: WO2013029769A1] The invention relates to an evaporator heat exchanger unit for a heating/cooling module for a motor vehicle, comprising at least one collector compensation reservoir for collecting a coolant and one evaporator, by means of which at least part of the coolant can be converted into a gaseous form, characterized by a housing enclosing an inner chamber. In said inner chamber, the collector compensation reservoir, the evaporator, and a coolant are arranged, wherein an expansion organ is arranged on said housing, by means of which a coolant is conveyed to the evaporator.
