Abstract (en)
[origin: WO2013029775A1] The invention relates to a terminal block (1) having at least one connecting terminal housing (2). The connecting terminal housing (2) extends in a longitudinal direction (32). In a transverse direction (33) transverse to the longitudinal direction (32), the connecting terminal housing (2) is row-capable. Viewed in the longitudinal direction (32), a first flange (10) extends in a first area (30) at a first end (8) of the connecting terminal housing (2) in a first direction (12). Viewed in the longitudinal direction (32), a second flange (11) extends in a second area (30) at the second end (9) of the connecting terminal housing (2) in a second direction (13) that is different from the first direction (12).
