Abstract (en)

[origin: WO2013030386A1] The invention is directed to an insulator (1) for a gas insulated device, an injection mold (15) and a method for making the same. The insulator (1) comprises an injection molded insulator disc (2) and a conductor (3). The insulator disc (2) comprises a center opening (4) encompassed by an inner bead (5) inside which the conductor (3) is arranged. The insulator disc (2) consists out of a first material, which is injection molded onto the conductor (3).
