Abstract (en)

[origin: EP2752276A1] The cutting tool (1) has a housing (2), a changing-blade (8), which is arranged on a holding portion (6) of the housing. A blocking element is provided for blocking the blade on the housing. The housing has a first positive locking element and the blocking element has a second positive locking element, which are locked together with the blade in a given position on the housing. Independent claims are included for the following: (1) a changing-blade with a clink head; and (2) a method for changing a changing-blade of a cutting tool.
