Abstract (en)
An openable top hung roof window (1). The roof window (1) comprises a frame (2) and a sash (3). The sash (3) is pivotally connected to the frame (2) along a hinge 4. The window (1) comprises an elongated member (6) configured for undergoing longitudinal movement when the sash (3) pivots relative to the frame (2). The elongated member (6) is resiliently biased means (7) for balancing the sash (3) in any of its open positions. The roof window (1) is provided with a linear actuator (11) comprising an axially movable actuation member with an extremity (10). The extremity (10) is configured for permanent connection or for releasable engagement with an extremity (9) of the elongated member (6).
