Abstract (en)  
[origin: WO2013034601A1] The invention relates to a wristband (1), in particular a watch band, comprising an optionally two-part band body (2, 3), wherein each band body (2, 3) has a multi-layer structure, comprising at least one core-material layer (8), a lining-material layer (9), and optionally a top-material layer (7). The core-material layer (8) adjacent to the lining-material layer (9) has ventilation channels (10), which are arranged all the way through perpendicularly to a band longitudinal direction (12) over the entire band width (13), wherein the ventilation channels (10) are open to the lining-material layer (9) at least in some sections.
