Abstract (en)
[origin: WO2013034340A1] A system module is proposed for a storage system with at least one frame unit (10), with at least one coupling unit (12) provided for a coupling, which can be disengaged by a user, with at least one part of at least one additional system module (14), and with at least one functional unit (16), which is arranged at least substantially inside a space (18) spanned by the frame unit (10), and with at least one positioning unit (20), which is provided to position the functional unit (16) relative to the frame unit (10) in at least two at least substantially different positions.
