Abstract (en)  
[origin: WO2013033769A1] A locking assembly (1) having a base (2); a pair of arms (4) extending longitudinally away from the base in opposing directions. Each arm has a proximal end engageable with the base and a distal end remote the base. The distal end of the arm has a locking means (10) movable relative to the base and adapted to engage a recess (20) of an object (22) to lock the object to the assembly.
