Abstract (en)
[origin: WO2013034124A1] The invention relates to a freewheel device, especially for the drive train of a motor vehicle, comprising an outer freewheel ring, an inner freewheel ring, a plurality of clamp rollers which are effective between the outer freewheel ring and the inner freewheel ring, and a switching device in which a bearing is arranged on one end between the outer freewheel ring and the inner freewheel ring to improve the design and/or functioning of the freewheel device.
