Abstract (en)

[origin: WO2014075647A1] Segment shaped digital imaging surface configured as a digital wall cover consisting of the mutual interconnected imaging modules, preferably in the polygonal shape, where the segment shaped digital imaging surface further consisting of a support net (3) formed by mutually connected eyes (6), into which the rear parts (5) of the imaging modules (2) are inserted, where the front part (4) of the imaging modules (2) is provided by imaging surface, whereas the front part (4) of the imaging module (2) has larger surface than the rear part (5) of the imaging module (2).
