Abstract (en)

[origin: WO2013034379A1] The invention relates to an emergency stop device, comprising a body (21, 24), a control button (20) that is translatablely movable along a control axis (X), at least one set of electric contacts which are normally closed and which include a mobile electric contact (70) and a stationary electric contact (71), a flexible blade (6) having a first free end and a second free end, and an actuation push member (12) which can be translatablely actuated, by said control button (20), between a rest position and an actuated position, and which is capable of engaging with the flexible blade (6). The flexible blade (6) comprises a bearing area for said actuation push member (20), and the flexible blade (6) is shaped so as to rigidify the bearing area.
