Abstract (en)

A method of forming a multi-piece insert (400) for an ophthalmic lens (200) comprising forming a back curve piece (492) and a front curve piece (410); depositing a conductive material (430, 440, 470, 480) and attaching an electronic component to one or both of the pieces; form a seal upon a surface of one of the pieces; combining the pieces to form an ophthalmic insert piece (400), causing the material to seal a cavity interior to the combination of the back curve piece and the front curve piece.
