Abstract (en)
[origin: EP2754764A1] The invention relates to a stench trap comprising: - a housing with an inflow opening and an outflow opening lying in a lower position during use; - a downward directed wall arranged in the housing and having a passage opening close to the underside, wherein a channel is formed from the inflow opening via the passage opening to the outflow opening by the housing and the downward directed wall; and a flexible unidirectional seal arranged in the channel close to the passage opening.
